Guidelines and conditions for the IBRA scholarship application – program C

The following documents must be submitted in English by one of the application deadlines on January 31.
Only complete applications will be considered by the IBRA Education Committees.

Electronically completed application form

Research project description (max. 5 pages):

Content: outline the problem, state of the art in this field, past research of the applicant in this field, hypothesis, aim of the study, detailed research plan, time schedule, relevant literature. **The research project has to be agreed with the fellowship director of the chosen IBRA Training Center.**

Abstract of the research project (max. 250 characters)

Curriculum vitae in English

List of publications – publication list must be structured by:

A. Original articles
B. Case reports / technical notes
C. Book chapters / proceedings, others (incl. monography)
D. Abstracts

Letter(s) of recommendation

Copies of diploma

Important information

Decisions will be communicated within six weeks after the application deadline.

No reason will be given for rejection of the applicant.

The applicant's research contribution is expected to be published in the IBRA Scientific Flash. Therefore, the applicant's research contribution has to be approved by the fellowship director of the IBRA Training Center and the chairman of the respective IBRA Education Committee.

It is the responsibility of the applicant(s) to ensure that all pertinent government and local hospital rules, including approval by the ethics committee, are complied with, if applicable. For animal experiments, the approval of the authorities must be granted, and the experiments should be performed according to the International Standard Organization documented ISO 10993-2.
Insurance is the responsibility of the applicant(s).
